PROFESSIONAL SUMMARY

B.Tech Computer Science & Engineering (IoT) student at VNR VJIET with a 9.45 CGPA, focused on Artificial Intelligence, Generative AI, and full-stack development. Builds AI-powered web applications using Python, JavaScript, React, Node.js, MongoDB, RAG, and LLMs. Built and deployed BudgetMind, an AI-driven budget optimization and procurement memory platform. Participant in Smart India Hackathon and Adobe Hackathon; interested in AI agents and production-oriented software engineering.

EDUCATION

VNR VJIET, Hyderabad

B.Tech in Computer Science & Engineering (IoT)

CGPA: 9.45/10 | Class XII: 992 marks | Class X: 10.0 CGPA

Expected 2029

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript

Frontend: HTML, CSS, React

Backend: Node.js, Express.js

AI/ML: Machine Learning, Generative AI, LLMs, Retrieval-Augmented Generation (RAG)

Databases: MongoDB, Supabase, Firebase

Tools & Platforms: Git, GitHub, Netlify, Vercel, Arduino, Blynk

PROJECTS

BudgetMind — AI Budget Optimizer & Procurement Memory Agent

[GitHub](#) | [Live Demo](#)

Python, JavaScript, React, Node.js, MongoDB, RAG, LLMs

- Developed an AI-powered budgeting platform that analyzes requirements and available budget to generate minimal, complete, value-focused spending plans.
- Implemented procurement intelligence to flag unnecessary or duplicate expenses, compare options, and account for recurring costs, hidden costs, and contingency reserves.
- Built memory-driven workflows that learn from past purchases, vendor experiences, budget overruns, savings, and procurement outcomes.
- Deployed the application as a live web platform on Netlify and maintained the codebase on GitHub.

HACKATHONS & COMPETITIONS

- Smart India Hackathon (SIH)** — Participated in a national-level innovation and problem-solving competition.
- Adobe Hackathon** — Advanced to Round 2.

CERTIFICATIONS

- AI Full-Stack Web Development

CODING PROFILES

- LeetCode — leetcode.com/u/Vijay_kumar2008
